

LINK LOCKS

Link Locks was founded in 1970 by Mr. Zafar Alam, a Mechanical Engineering graduate from A.M.U, with the aim of revolutionizing an industry that had long been dominated by a single brand with a monopoly in locking systems. But Mr. Alam saw an opportunity to introduce a new brand with new ideas and approaches that could challenge this dominance. With a vision to offer unique designs, distinct finishes, and precise engineering to Indian consumers at budget-friendly prices, Mr. Alam established Link Locks Pvt Ltd and today, the company is a renowned manufacturer of high-end hardware catering to Indian consumers.

Mr. Alam's vision was to introduce Indian artisans' exceptional work to the West while maintaining a balance between the two worlds. **The company's core principles include original designs, unexpected finishes, superior quality materials, and sustainable production practices.** Link Locks Pvt Ltd has successfully competed with the older brand, offering superior quality products that cater to the demands of modern consumers. The brand's success is a testament to its commitment to innovation, quality, and meeting the needs of its patrons.

Link Locks Pvt Ltd is a company that takes great pride in being made in India and they have achieved this through their self-developed production technology. With their cutting-edge production technology, Link Locks Pvt Ltd produces high-quality hardware that is not only durable but also aesthetically pleasing. This self-sufficiency has allowed the company to maintain high standards of quality control, ensuring excellence in all products. The company's in-house R&D team develops custom products tailored to their customer's specific requirements using drawings, samples, or ideas. **They offer solutions with advanced features, such as double locking technology, key mechanisms with 2 crore combinations, computerized key, etc. that ensure customer satisfaction.**
